Profile

I have a strong passion for building high quality, efficient, scalable, and maintainable mobile and web applications that look nice.

Work & Experience

Support Specialist, eLink Design; Lexington Kentucky — 2015 - 2018

- Worked on day-to-day support emails and tickets, which spanned a wide range of technical difficulties such as email, server, or website issues or updates
- Participated in technical meetings to ensure effective resolution of issues
- Maintained security and updates for several cPanel servers with a multitude of clients

Senior Software Engineer, eLink Design; Lexington Kentucky — 2018 - Present

- Lead implementation of Vue and accompanying build system using Webpack for in-house framework's frontend stack
- Used native and cross-platform frameworks including UIKit, SwiftUI, and React Native to develop high-scale, enterprise distributed applications
- Focused on attention to detail and design for optimal user experiences
- Helped maintain and manage AGILE development for project teams

Software Developer, NoLimits Central, Lexington Kentucky — 2015 - Present

- Side project built in Laravel and Vue containing a forum, real-time notifications and messaging, file exchange for custom game format, and more
- Parsed custom game format to extract metadata for ease of use
- Used Pusher to implement real-time, socket based features
- Implemented custom forum with threads, replies, unread count, categories, roles, and more
