Profile

I have a strong passion for building high quality, efficient, scalable, and maintainable web and mobile applications.

Work & Experience

Support Specialist, eLink Design; Lexington Kentucky — 2015 - 2018
Helped existing clients with a variety of technical issues ranging from email to server problems. Worked on small and large updates for existing web applications while delivering results in a timely manner.

Senior Software Engineer, eLink Design; Lexington Kentucky — 2018 - Present
Developed high-scale web applications with custom in-house CMS and framework built on Symfony and Doctrine, along with other CMS's such as WordPress. Maintained web and mobile applications for existing clients.

Developed small scale and enterprise cross-platform and native (iOS) mobile applications, with an attention to detail and design. Helped maintain AGILE workflow for team, as well as sprints using Monday.

Software Developer, NoLimits Central, Lexington Kentucky — 2015 - Present
A file exchange and online forum personally developed by me, with features such as realtime messaging, S3 file uploading / downloading, robust searching, and more.

Tates Creek High School — IB Diploma, 2015
